April 2022 - Present

Role: MERN Stack Developer

Octoped Admin Panel

- Led the development of the Octoped Admin Panel, overseeing all frontend aspects..
- Developed the entire admin panel from scratch using ReactJS, ensuring high performance and scalability.
- Engineered a JavaScript bridge to facilitate enhanced interaction between the Android app and Web View.
- Implemented advanced features such as dynamic layouts for blogs and case studies, nested comments, and photo/video posts.
- Integrated APIs to enable seamless CRUD operations, enhancing data management capabilities.
- Designed and optimized the admin panel for improved mobile responsiveness, ensuring accessibility across devices.

ANI Admin Panel

- Led the development of the Ani Admin Panel, resulting in a 30% increase in user engagement.
- Introduced a visually appealing UI inspired by Pinterest, enhancing the user experience and navigation within the admin panel.
- Utilized Redux for state management , resulting in a 25% reduction in code complexity and a 15% increase in team productivity..
- Developed admin features include user management, activity tracking, Infinite scrolling and sub-admin setup.

Breastinform

- Developed landing page for BreastInform website using React.js and MUI.
- Ensured full responsiveness across various devices and screen sizes.
- Collaborated with backend developers to ensure smooth data flow and functionality.
- Conducted thorough testing to identify and fix any bugs or issues.

PROJECTS

Telegram Bot

- Engineered a multitasking Telegram bot aimed at enhancing user productivity by incorporating a diverse set of features.
- Utilized NodeJS and the node-telegram-bot-api library to build the bot infrastructure..
- Expanded proficiency in NodeJS, API integration, and bot functionality, offering a practical and versatile solution for user engagement and productivity enhancement.
